

Easy opening every time

SERVO-DRIVE is the new opening feature for TANDEM and TANDEMBOX drawers. Whether the drawer is heavy or light, wide or narrow, the gentle opening always remains the same.

Drawers open automatically with just a touch of the drawer front or with a light pull of the handle. This unique feature is based on an electrical drive that, once activated, opens the drawer for you. Customers will be amazed by the quality and ease of use.

Drawers open effortlessly

Opening Action

With SERVO-DRIVE even heavy deep drawers can be opened effortlessly with just a touch.

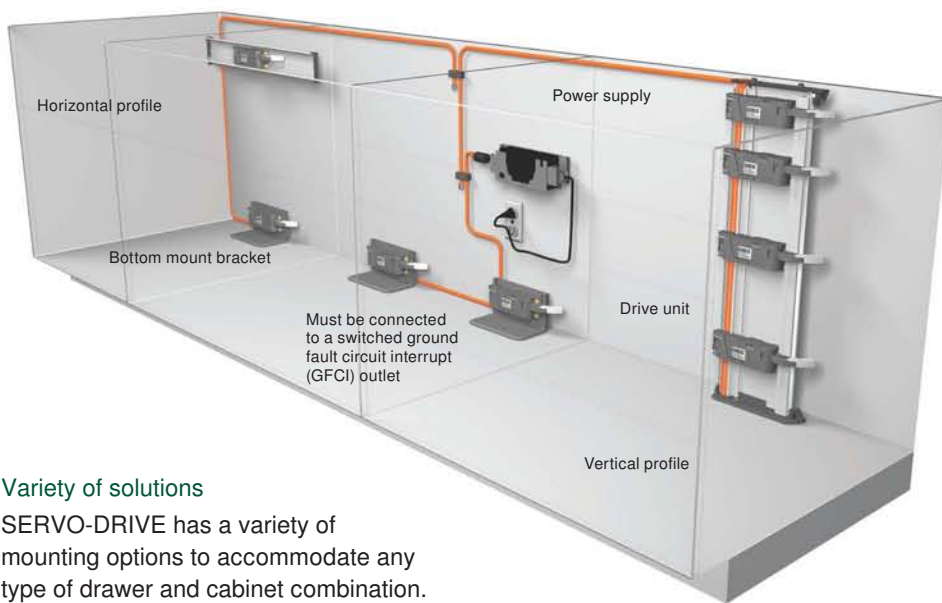

Quiet Closing

By combining this feature with the silent and effortless closing action of BLUMOTION, we have taken perfecting motion to a new level.

Design Options

SERVO-DRIVE can be used with any drawer length, face frame or panel construction using TANDEM plus BLUMOTION or TANDEMBOX.

Variety of solutions

SERVO-DRIVE has a variety of mounting options to accommodate any type of drawer and cabinet combination.

To assist in installation

Blum provides a boring template for the top and bottom adapters and a boring template for the Blum distance bumper. These make installing SERVO-DRIVE a breeze. For TANDEM and TANDEMBOX runners we offer a variety of templates for easy installation.

On/off switch

An on/off switch is recommended. This makes it easy to deactivate SERVO-DRIVE throughout the kitchen to save energy. The drawers will still open whether the power is on or off. With just a light pull of the handle, drawers run smoothly each and every time.

Features

- Designed for use with Blum runner systems with integrated BLUMOTION only
- SERVO-DRIVE can be used with all drawer lengths
- SERVO-DRIVE can be used without drawer modifications
- Drawers are not connected to the drive unit
- A wide variety of mounting options are available to cover all standard applications
- One type of drive unit for all applications
- Five year limited warranty on electrical components

Benefits

- Works with both frame and panel cabinets
- Requires just a light touch or pull to activate
- Maintenance free
- Minimal installation space required
- Cabinets with Blum concealed runners with integrated BLUMOTION can be retrofitted with SERVO-DRIVE
